

## 6. Competition Venues

### 6.4 Newly Built Venues of Competition

#### 6.4.1 Han River Regatta Course/Canoeing Site

##### □ Selection of location

Under the original plan for Olympic facilities, the regatta and canoeing course was to be constructed on the area the Seoul city government proposed when it made a bid for the right to host the Olympic Games; the area is located in Topyong-ri, Kuri-up, Namyangju-gun, Kyonggi-do (province), and the city government planned to build hockey site and tennis court there to create a Han River sports complex.

As a candidate site, the Seoul city government selected the Han River riverside in Topyong-ri in conformity with the requirements presented by the Fédération Internationale des Sociétés d'Aviron (FISA) including the distance (one hour ride) from the Olympic Village, weather conditions such as wind direction and sunlight direction, and conformity between the axis of the site and wind direction. The city government decided to fund the project with private capital. But the Topyong-ri was written off as the candidate site because of the high cost of the ground-leveling project which would have been double the actual construction costs.

The other candidate sites that were selected thereafter included Han River riverside in Kayang, Misari, and Yangsu.

After considering five conditions including the conditions involving the site itself, administrative conditions, maximum utilization, investment ratio and distance from the Olympic Village, Misari riverside was selected as the final candidate site. Misari riverside topped the list of candidate sites in all but one condition — that involving investment ratio.

As with other competition sites, the leading factors in the construction of regatta course were the fulfillment of requirements set by FISA, optimum use of budget, high efficiency of investment to enable post-Games utilization, and proximity to the Olympic Village.

The SLOC decided to construct the regatta course on the Misari river, to develop the whole area within the standards of Han River water preservation and to utilize the site as a spacious resting place for citizens after the Games.

The SLOC and Kyonggi-do administrative authority agreed to share the construction cost.

The total area of the site covered 660,000 square meters, including regatta lake, management facilities, spectator facilities, road, parking lot,

green zones, and embankment. The embankment, 1,732 meters at upriver and 1,230 meters at downriver, was constructed to have EL 2,300, a rare flood level in 200 years.

The project required consultations with the Construction Ministry, Home Ministry and the Defense Ministry. After the site of the regatta course was finally confirmed in December 1983, Kyonggi-do authority, which was responsible for the construction, began to make administrative preparation for the job. Because the area was affected by regulations on land development and protection of military facilities, care was taken to comply with the regulations and administrative procedures through consultations with relevant government agencies.

The general design guidelines for the regatta course were strict when compared with other competition venues. Some examples: 1) The design must conform to the standards of criteria for international competition facilities and mandatory conditions of compliance; approval of FISA regarding the matter must be obtained through consultation to preclude any trouble in conducting Olympic Games. 2) Measures should be taken to enable all citizens to use the facility after the Olympic Games. 3) The construction of the competition site must not impair the surrounding environmental conditions and related facilities. 4) Design must be technically feasible and conform to the standards set forth by the related laws.

Prior to the design, soil quality, geographical survey and water quality investigation were made. Emphasis was placed on the site of competition and secondary facilities. Considering the functional relationship between sports and tourism, the main site and secondary facilities were so arranged as to ensure mutual linkage conforming to the regulation governing international venues of competition.

For efficient utilization, related facilities were placed bearing in mind long-term post-Games perspectives. In light of the special characteristics inherent in the regatta course, emphasis was also placed on the landscape architecture. The landscape was developed so as to form a graceful linkage with the Han River's green zone under Seoul's park and green zone system. Considering the water levels between the Han River's mainstream and the competition site, water intake was done through pump and drainage through a natural course. The speed of water flow in the course, a crucial element of a regatta course, was held down to 10 meters per second.

The regatta course was so designed as to provide competitors on all lanes with equal conditions against wind direction and that their vision would not be obstructed by the progress of competition. The slopes on both side of the lake were designed to minimize waves.

Construction started on September 18, 1984 and was completed on June 10, 1986. The width of the regatta is 140 meters, and length 2,212 meters; the water depth is 3 meters.

##### □ Games preparations

Housed on the first floor of the headquarters building were the office for officials, judges' office, and the competition office. On the second floor were VIP room and technical officials' office. Amenities facilities and Games operation facilities were brought together in the headquarters building to allow efficient management. The building for competitors housed an athletes' room, massage rooms for male and female competitors, stroke gauge room and doping test room. The boat warehouse, or the boathouse, has one permanent one-story building covering 7,860 square meters, and three temporary structures. The boathouse is capable of accommodating 220 boats.

A tower is located on top of the headquarters building; on the uppermost part are gauge room, office of judges and interview room. On the fourth floor are the announcers' room and the technical officials' office.

Measurement devices included 29 sets of eight kinds including a photo device which could measure up to one-100th of a second.

Weather devices measuring wind direction and speed were installed at the start point and 1,000-m point. Also in place were a magnetic thermometer, hygrometer and rain gauge.

Temporary facilities included a shop, lounge, post office, telegraph and telephone booth, and public telephone booths. A promenade course, eight meters in width and 1,365 meters in length, was arranged. A parking lot was arranged to handle some 200 cars. For water intake before the conduct of competition, about 786,000 tons of Han River water was drawn into the course, raising the water level to three meters on September 1, 1988.

On September 13, some 70,000 tons of water that had evaporated were filled up to keep the water level at three meters.

#### Facilities and Games preparations

##### Scope

- Area: 1,388,436m<sup>2</sup>
- Seating capacity: 25,000

##### Venue

- Course: 2,212×140×3m (8 lanes)
- Start floating bridge: 3 sets (rowing — 1; canoeing — 2)
- Boat landing floating bridge: 3 sets (rowing — 1; canoeing — 2)

##### Facilities

- Operation headquarters: 2,155m<sup>2</sup>
- Athletes waiting room: 2,496m<sup>2</sup>
- Athletes lounge: 1,040m<sup>2</sup>
- Press center: 302m<sup>2</sup>
- Broadcast center: 288m<sup>2</sup>
- Start tower: 30m<sup>2</sup>
- Security personnel waiting room: 288m<sup>2</sup>
- Boathouse: 5,142m<sup>2</sup>; one storey
- Stand: Headquarters — 2,500 seats; lawn — 22,000 persons; athletes — 500 seats; VIPs — 250 seats
- Parking: 60 cars for VIPs and officials; 506 for spectators; 100 for athletes; 19 for journalists; 20 for broadcasters
- Training site: 8 lanes for rowing; 6 lanes for canoeing; three places for mooring; embankment — 100m; three boat washing places
- Scoreboard: 7.4×10m (names of competitors, events, distance, nationality, results, competition time indicated in Korean and English and processed in various graphics)

##### Construction

- Period: September 18, 1984-June 10, 1986
- Cost: 10.3 billion won
- Designer: Korea Engineering Consultants Corp.
- Constructor: Samsung Construction Co., Ltd.

##### Repair works

- Period: March 23, 1987-August 20, 1988
- Cost: 1,347.15 million won
- Specifications: New road construction and additions to facilities; superior drainage facility construction; voltage control of transformers; some changes in competition site; securing practice area and warm-up facility

## 11. Competition Management by Sport

### 11.5 Canoeing

Canoeing competition was held at the Han River Regatta Course located in Misari, Dongbu-up, Kwangju-gu, Kyonggi-do from September 26 to October 1, drawing 440 competitors from 32 countries.

The canoeing competition was made up of 12 events, nine for men and three for women; 249 athletes from 31 countries competed in the men's nine events, and 72 athletes from 18 countries competed in women's three events.

The competition was divided between Canadian canoe and kayak, and conducted on 500-meter and 1,000-meter courses. The kayak competition was divided into five for men and three events for women; The Canadian canoe competition was divided into four events for men only.

The competition progressed from elimination heats and repechage to semifinals and finals. A total of 101 races included 33 preliminaries, 22 for repechage, 34 for semifinals, and 12 for finals.

#### 11.5.1 Competition Preparations

Canoeing was introduced to Korea in the 1970s, but the sport did not begin to attract much attention until Seoul was awarded the right to stage the Olympics. Canoeing was the least popular spectator sport among the 27 sports of the Seoul Olympic Games. Canoeing is still unfamiliar to people in most Asian countries and the sport was not included in the Seoul Asian Games schedule.

In the planning stage for the Seoul Olympics, the SLOC focused its energy on the organization of a canoeists' association, the cultivation of specialized athletes and competition officials, and acquisition of key staff members in an effort to enhance competition managing capabilities.

Embracing the preparations for the Olympic Games, the SLOC set out to gather basic data on canoeing competition and the data of past international competitions, while sending officials for overseas education, conducting training at home, and inviting foreign specialists to conduct training sessions. Under the IOC solidarity program, the secretary-general of the International Canoe Federation (ICF), chairman of the race subcommittee, and chairman of the technical subcommittee visited Korea three times between 1986 and 1987 to supervise education and training.

Reflecting the systematic endeavors made by the SLOC to cultivate operation personnel, six local officials passed an international technical officials qualification test administered by the ICF in 1986. Five more obtained the qualification in 1987.

For research and investigation, the SLOC sent researchers to the 1983 Los Angeles pre-Olympics and Tokyo Olympics commemorative games, the 1984 Los Angeles Games, and the World Canoeing Championships, each year from 1985. Canoeing equipment, including 87 racing boats, were locally manufactured, in a move to lay the foundation for the growth of canoeing in the country.

As part of the pre-Olympic activities, the SLOC hosted the Seoul International Canoeing Competition in October 1987, and scrutinized operating capabilities with respect to the reception of VIPs, accreditation of canoeists, operation of the athletes' village, and the conduct of competitions and awards ceremonies.

The Misari canoeing/rowing course by the Han River was completed in April 1986 prior to the 10th Asian Games; the course is equipped with training lanes.

The racing course is 2,212 meters long, 140 meters wide, and three meters in depth, and is made up of six lanes for rowing and nine lanes for canoeing; the course totals 1,388,436 square meters, and is equipped with facilities able to accommodate 25,000 spectators, along with ample parking lots.

The course is located 10.6 kilometers from the Olympic Village, and a five-storey tower and two-storey building to house operations were also provided. Interim time measuring spots were installed at five locations to conduct and check the competition.

The Canoeing Operations was organized in January 1988, and moved to the regatta course in March to begin on-site operation preparations.

The Canoeing Operations consisted of six managers and 28 officers; the staff was comprised of six SLOC officials, 91 support personnel, 242 volunteers and one temporary employee, totalling 340. In addition, 138 contract personnel assisted in the conduct of the competition.

The competition officials commissioned by the ICF totalled 42, including 13 Koreans.

The equipment and implements required for the competition management included 87 racing boats, 15 motor boats, scrutiny scales, length-measuring rules, lane-width measuring devices, stopwatches, walkie-talkies, starter guns, racing boat numbers, competitors' numbers, binoculars, and lead bags.

The racing boats and most other equipment were manufactured in Korea, and timing equipment was rented from Swiss Timing.

#### 11.5.2 Conduct of the Competition

Canoeing competition was held only when at least three boats took part in a race. When there were many boats participating in the races, the competition was conducted in elimination rounds, semifinals and finals. The maximum number of boats allowed to

compete in a single race was nine. In order to adjust the number of boats to nine, the semifinals were conducted in three groups, and the first to third finishers qualified for the finals.

Because each team was allowed to enter only one boat in each event, the maximum number of competitors each NOC could can enter the competition was 10 for the men's kayak, five for the women's kayak, and six for the Canadian canoe.

The number of racing boats which entered in the competition included: 22 in the men's 500-meter kayak singles; 24 in the 500-meter kayak pairs; 21 in the 1,000-meter kayak singles; 25 in the 1,000-meter kayak pairs; and 18 in the 1,000-meter kayak fours. In the women's events, there were: 18 in the 500-meter kayak singles; 15 in the 500-meter kayak pairs; and 13 in the 500-meter kayak fours. As for the Canadian canoes (men only), there were: 19 in the 500-meter singles; 18 in 500-meter pairs; 17 in the 1,000-meter singles; and 18 in the 1,000-meter pairs.

The countries which entered competitors in all 12 events were host Korea, Canada, the Federal Republic of Germany, Great Britain, the German Democratic Republic, Hungary, Poland, the U.S.S.R. and the United States. Although the host country entered canoeists in all the events, not one Korean competitor made it to the second elimination stage. Even in repechage, Korea trailed far behind, and failed to make to the final in a single event.

East European nations dominated the races; the German Democratic Republic finished first in the medals table with three golds, four silvers and two bronzes; it was followed by the U.S.S.R., with three golds and three silvers; then it was Hungary, with two golds, one silver and one bronze. The United States captured two golds to place fourth.

The number of entrance tickets issued came to 140,958, but sales stood at 63,836, recording a 45.9 percent sales rate. The ticket sales included 16,530 for general spectators, 29,162 for students, 16,285 for groups, and 1,859 for overseas ticket sales.

#### Medal Tally by Country

Country	Gold	Silver	Bronze
German Dem. Rep.	3	4	2
U.S.S.R.	3	3	
Hungary	2	1	1
U.S.A.	2		
Bulgaria	1	1	3
New Zealand	1	1	1
Poland		1	2
Australia	1	1	
France			1
Netherlands			1
Total	12	12	12

19

20

19. Finish line of the Han River Regatta Course; 440 competitors took part in 12 different events.

20. Spectators watching the canoeing competition, which was sparsely attended due to Koreans' unfamiliarity with the sport.
