

## Typhoon (TY1919 Hagibis) Information

As of 13:30 on October 11, 2019

- The typhoon may stay very close to or land on the eastern Japan from the evening of the 12th to the late night while maintaining a very strong power, and there is a risk of storms and warning-grade heavy rain in a wide area of the eastern Japan.
  - There is a risk that a fierce wind will blow, such as a signboard or streetlight falling down. In addition, low land near the coast and estuary can be flooded extensively due to storm surges. Warning is also required for heavy rain.
  - Multiple railway companies and airlines have already announced cancelation of the operation or their possibilities of cancelling the operation between Oct 11 and 13.
- ✓ **It is recommended that you refrain from going out unnecessarily.**
  - ✓ **Close windows and curtains at night in case the window glass breaks.**
  - ✓ **In case of a power failure, it is recommended that you fully charge your smartphone and other electronic devices in advance.**
