

ARRIVAL TO SLOVAKIA BY CAR

<https://korona.gov.sk/en/travelling-to-slovak-republic/>

As of 19 July, new Decree 231 is in force, which regulate the regime at the border and the **obligation of home isolation**. They also impose an obligation on persons over 12 years of age to register in the [eHranica form](#). The rules on entry into Slovakia and subsequent home isolation are differentiated according to the age of the person and on the basis of other conditions.

Exemptions that require a **negative RT-PCR test result no older than 72 hours**

- [players of a sports team, members of the management committee or referees,](#)

... or to participate in international competitions organized by a sports federation on the basis of participation in these competitions and you can prove it,

Therefore,

- Every participant must have a **negative RT-PCR test result no older than 72 hours**
- HOC will provide every NF **Invitation Letter**

ARRIVAL IN SLOVAKIA BY AIR

If you are arriving in Slovakia by air, you are also required to register at <https://www.mindop.sk/covid/>.

If you require airport shuttle, please contact travel@canoe.sk

BOAT TRANSFER / STORAGE

Teams, that will not use the individual transfer, will be provided by HOC transfer the boats from X Bionic to venue.

Teams with individual transfer will take their boats to Cunovo to the first training.

ACCREDITATION

A COVID-19 collection centre will be set at the hotel by the HOC.

Every participant will have to undergo LAMP test upon their arrival.

To proceed with a smooth testing procedure, please make your gargling properly. In case of wrong procedure, new test is required and paid by themselves. When travelling by car, please arrange your arrival up to 2 pm latest.

Directly after the testing, each participant is requested to wait in the car or round the car with 2 m social distance from other teams. This shall not take longer than 75 minutes.

Upon negative LAMP test result, participants will be provided with an accreditation card and make the whole accreditation process (Solemn declaration, Covid protocol to be signed).

On the fourth / fifth day each participant will have to undergo another LAMP test.

AT THE HOTEL

The World Championships Village has a preferable location in an isolated part of Šamorín. The area is completely enclosed and offers the possibility of complete seclusion with 24-hour monitored security access consisting of only one entrance gate with controlled entry.

- Hermetically sealed area offering controlled entry with a ban on entry by all unauthorized personnel.
- Access granted only with a negative COVID-19 test and subsequent provisions of mandatory testing for COVID-19 enforced at the entrance to the WCHV.
- The establishment of an isolated quarantine pavilion with a separate entrance for the individuals in isolation.

The accommodation will be provided EXCLUSIVELY by x-bionic® sphere - a multifunctional resort for sports and relaxation. At one location there is a passion for healthy living, world-class Olympic equipment and a wide range of relaxation facilities for elite athletes and their teams. www.x-bionicsphere.com/en/

Instructions before arriving to X-Bionic Sphere:

Demonstration of a negative test result for entry into the QCTA Quarantine Pavilion. Negative RT-PCR test, not older than 72 hours required for access to the LAMP collection before accommodation in X-Bionic Sphere.

All common areas, sports grounds and operations of the Quarantine Center for top-level sports are disinfected on the basis of the set approach for the hygienic-epidemiological regime with the appropriate type / concentration of disinfectant solution and the relevant exposure time.

At a time of pandemics and exceptional hygiene standards, a higher standard of room cleaning is maintained. Oxivir Excel CE is used in a 2% concentration with a minimum exposure time of 30 s from application to surfaces with a recommended time of 5 min after application. As another solution, Suma alcohol spray D 4.12 is used as an undiluted solution applied directly to the surfaces, the preparation is without rinsing and it is allowed to dry on the surfaces. Suma

BAC D10 in a concentration of 1% solution is used for wet washing of hard floors in all common areas, sports grounds and operations of the Quarantine Center.

In the reception and entrance hall, the 2% Oxivir Excel CE solution is applied to the contact points of tables, chairs, reception desks, telephones, door handles, railings, pens, waste bins, buttons in lifts and terminals.

During the entire time of disinfection and cleaning of the lobby and hotel reception area, the air purifier is in continuous operation, which uses a unique combination of ionization technologies, state-of-the-art HEPA filter, photocatalytic oxidation (PCO) and patented ActivePure® technology.

In the areas belonging to the reception, luggage service, a preparation of 2% solution Oxivir Excel CE is used and directly applied to the surfaces of tables, counters, chairs, door handles, luggage carts, shelves and areas of contact with hands.

In the kitchen, bars and restaurants, Suma BAC D10 is used in a concentration of 1% solution for wet washing of solid floors, surfaces coming into contact with food. The contact points of tables, chairs, light switches, touch surfaces of door handles, taps, dispensers, trays, cash registers, terminals, sports equipment use 2% solution Oxivir Excel CE and Suma alcohol spray D4.12 in undiluted solution directly applied to surfaces.

Public toilets are cleaned with a 2% Oxivir Excel CE solution directly applied to the surfaces of toilet seats, flushing buttons, dispensers, faucets, waste bins, door handles. Suma BAC D10 is used for floors in a concentration of 1% solution.

In conference rooms and meeting rooms, we use a 2% solution of Oxivir Excel CE directly applied to the surfaces of tables, chairs, door handles, remote controls and furniture.

Sports grounds and pool areas use a 2% solution of Oxivir Excel CE directly applied to the surfaces of sunbeds, tables, shelves, showers, railings and ladders.

The hotel laundry area is cleaned with a 2% Oxivir Excel CE solution applied directly to the surfaces of door handles, table tops, laundry trolleys, dispensers, laundry aids.

Workrooms, changing rooms, toilets are cleaned with a 2% solution of Oxivir Excel CE directly applied to the surfaces of tables, chairs, benches, toilet seats, dispensers, sinks and door handles.

In the premises of the employee canteen, Suma BAC D10 is used in a concentration of 1% solution on the surfaces of tables, chairs, counters and surfaces that come into contact with food.

A 2% solution of Oxivir Excel CE is applied to the contact points of tables, chairs, armchairs, sports equipment, door handles and hand contact areas in the area of passageways and common areas.

During the entire time of disinfection and cleaning of passageways and common areas, the air cleaning device is in continuous operation, which uses a unique combination of ionization technologies, state-of-the-art HEPA filter, photocatalytic oxidation (PCO) and patented ActivePure® technology.

Sanosil, which is based on hydrogen peroxide and silver, is used to disinfect common areas and sports grounds.

Machines applying air purification technology are constantly switched on in the premises, using a unique combination of ionization technologies, a top HEPA filter, photocatalytic oxidation (PCO) and patented ActivePure® technology.
