## Technical Video Signal

From 2018 a new workflow has been created to follow the constant improvement of competition technologies and On Venue Results services ICF is providing to judges, teams and LOC:

### Judges & TVS production / FEED A (odd) + FEED B (even)

- START SIGNALS THURSDAY @ 16h00 (Tech. Rehearsal full length), till the end of the SLALOM events on Sunday @ 15h00.
- 6 Cameras LIVE (4 operated & 2 fixed) + TV graphics
- ICF TV is only providing the 6 Cameras and the 4 operators. All Camera signals are routed to the OB VAN for Image Control, then Siwi Data is wiring all signals back to the OVR position to have the 2 switchers "cutting" the Feed A & B for judges and TVS
- These 2 feeds are entirely directed, "switched" by Siwi Data with their equipment installed inside the OVR area and will be provided in the video tent.

Remark: TVS is a service produced by a company hired through ICF. The host will undertake the strongest effort to provide the best quality but cannot guarantee a 100% coverage.

## WIFI

Other than in previous years there will be **NO PUBLIC WiFi** on venue. The HOC recommends that participants should use the public mobile network which is covering the area with a LTE bandwidth. For overseas travelers the HOC recommends to purchase Pre-Paid SIM Cards from EU provider. Since last year there are no more roaming cost within EU. The reason for this decision is to guarantee a stable internet connection for the core of the race organization as well as internet livestream and press and media activities. Thank you for your understanding.
