

Criteria for the ICF Registered Testing Pool (RTP)

The ICF Registered Testing Pool (RTP) is a “living” document and will change frequently based on performance during the season, injury, retirement and doping infraction.

The ICF RTP starting from 1st January, includes athletes chosen according to the following criteria:

Canoe Sprint:

- Top 5 in the ranking after the World Cup races
- Top 5 at the ICF Canoe Sprint World Championships (Seniors)
- Selected competitive Athletes from Federations otherwise not represented on the list

Canoe Slalom:

- Based on final ICF World Ranking and ICF Canoe Slalom World Championships (Seniors)

The presence of a Domestic Doping Control Testing Program and/or a strong National AntiDoping Organisation (NADO) influences the make up of the list.

Athletes who were on the sanction list (starting from 1st January 2009) could be also placed on the list for 2 years after their period of ineligibility.

The ICF RTP and its criteria which are subject to change will be published on the ICF website (www.canoeicf.com) under the Anti-Doping section.
