MARTIN MARINOV CV

I have a good understanding of the technical rules and their use in the discipline. Since the beginning of SUP under ICF, I was always involved at SUP Technical rules development and improvement.

I developed the ICF SUP technical deliverables and created all progressions based on the different number participants. I also worked with host organising committees for each World Championships in order to help them to deliver an excellent competition and great experience to the participants. During the competitions I worked closely with the timing and scoring providers in order to deliver a fair competition.

Working at ICF I learned to listen actively, not to talk over others, and ensure that everybody has an opportunity to fully contribute, respecting differing views.

During my work at ICF I always abide the Code of Conduct and Code of Ethics.
